Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Adamany et al in view of Weibel et al, Vinson, and Hine.

Adamany et al disclose a method of making cheese comprising adding cellulose to milk prior to fermentation (entire document).

The claims differ as to the specific cellulose utilized and the addition of other additives.

Weibel et al disclose a microdenominated cellulose for use in foods (see entire document).

Vinson discloses a structurally expanded cellulose for use in food (see entire document, especially column 2, lines 49-57).

Hine et al disclose the addition of hydrocolloid gums, such as guar and xanthan, to cheese (see entire document). The addition of gums to cheese products is conventional and within the skill of the art.

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to use the structurally expanded cellulose of Weibel et al and Vinson in that of Adamany because the addition of cellulose products to cheese products and processes is conventional in the art.

The references clearly teach the production of cheese using cellulose products and the conventional use of structurally expanded cellulose. Applicant is using known components to obtain expected results.

In the absence of unexpected results, it is not seen how the claimed invention differs from the teachings of the prior art. Applicant's claims are drawn to a combination of known components which produces expected results, see *In re Kerkhoven* 205 USPQ 1069 and *In re Gershon* 152 USPQ 602.

All of the claim limitations have been considered. None of them are seen as serving as basis for patentability.

No claim is allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leslie Wong whose telephone number is 571-272-1411. The examiner can normally be reached on Tuesday-Friday.
